Regional Roundtables (RR) Switzerland General information

The RR Regional Roundtable is a professional discussion forum in your region referring to a specific topic. RRs are held in German or French. This makes discussions easier if concerned guidance are published in the official Swiss languages. However Roundtables may also be performed in English if required. There will be offered different RRs focusing on specific topics e.g. Drug regulatory Affairs (DRA), Clinical research (CR), Reimbursement (HTA).

The Roundtable DRA has been established over 15 years ago at Zürich with over 50 members at present.

Basic principles of a RR are as follows:

RR is defined by

- Topic
- Region
- Language

Programme

The programme is mainly defined by the participants themselves. Core element is the discussion on submitted questions and networking. Common working tools can be developed or short presentations to specific subjects can be organized by the group.

Invited to participate are

- Members of SwAPP at reduced fee
- Non-members at a higher fee level

Prerequisites to participate are

- You have a direct function in the specific topic of the RR in Switzerland. Participation is independent of term of experience. That means you can be a beginner or an advanced professional in the specific topic
- You have to actively participate, by submitting at least a question in advance to a practical aspect of the topic concerned.

Application and Termination

- Your first application for admission to a specific RR (application form see homepage SwAPP) has to be approved by SwAPP. Afterwards you stay member of the specific group, as long as the prerequisites of participation are fulfilled.
- If you miss to attend to your RR for two consecutive meetings your absences will be interpreted as your termination of participation.
